

Quick Release RATCHET

Each Drive Comes in a
9pc Display Carton

- Zero Degree® Gearless ratchets are designed to work in extremely tight work spaces by gripping and turning a fastener in less than 1° of sweep.
- Vertically stabilized roller bearings support a positive clutch design that engages instantly for greater control and a more precise feel.
- Replaces the traditional geared ratchet mechanism so there are no teeth, pawls, or springs to breakdown.
- High carbon chromium steel roller bearings for years of dependable use.
- Fully polished, nickel chrome plated CR-V body for maximum strength and durability.
- Meets ASME B107.110 specs for torque and life cycle.
- U.S. Patent, other Patents Pending

LIFETIME WARRANTY

1/4", 3/8" AND 1/2" DRIVES available.
