Eco-Emergency Lantern

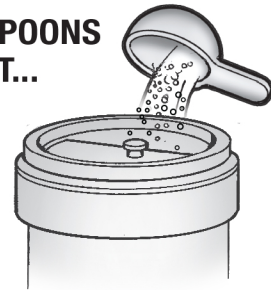

NEW!

- ▶ Patented technology uses saltwater as an electrolyte to activate a Magnesium Fuel Cell and power the LED lantern.
- ▶ No batteries, electricity, liquid fuel or sunlight are needed. Simply add water and salt, or seawater.
- ▶ Power can be generated anytime, anywhere and provides over 100 hours of continuous light.
- ▶ The Magnesium Fuel Cell provides virtually unlimited refueling by replacing the magnesium bar and adding fresh water and salt.
- ▶ Magnesium bars are safe, non-toxic, eco-friendly and will last 25 years if kept dry.
- ▶ Made from durable ABS, the lantern produces 40 lumens and is rated IPX4 for water resistance.

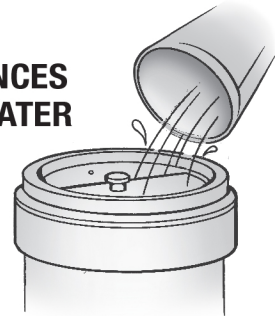

MAGNESIUM FUEL CELL

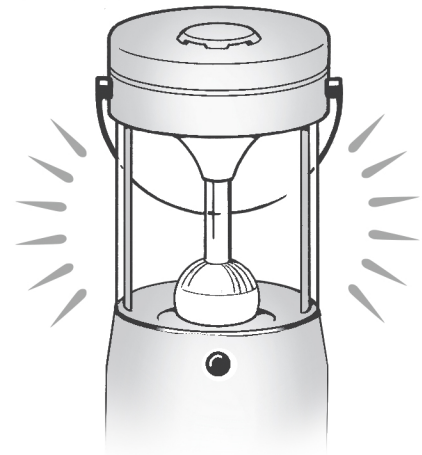

2 TEASPOONS OF SALT...

+ 6 OUNCES OF WATER

= OVER 100 HOURS OF LIGHT
